0425 461 415 | Ciaran.engelbrecht@outlook.com | linkedin.com/in/ciaranengelbrecht | ciaranengelbrecht.com

ICT professional with hands-on experience across school ICT, managed services, government cyber security and WA Health environments. Skilled in end-user support, Microsoft 365, Windows/macOS/iPad support, identity and access, endpoint management, networking, documentation, troubleshooting and practical automation.

WORK EXPERIENCE

Graduate ICT Officer | WA Health

2026-Present

Placements across enterprise health data and internal data science application platform development.

- Validated enterprise health datasets in Snowflake using SQL across fact/dimension tables, joins, mappings, source-to-target rules and business logic.
- Developed SQL comparisons between raw and curated datasets to identify transformation discrepancies and support data integrity investigations.
- Supported SharePoint metadata structuring and large list uploads to improve information governance, discoverability and structured data management.
- Contributed to an internal data science application platform for dashboards/data access using FastAPI, React/TanStack, Better Auth/RBAC, SQL integration and API-based design.
- Supported documentation, authentication/RBAC design considerations, data access patterns, dashboard usability and Git/Azure DevOps-style delivery workflows.

Graduate ICT Officer - Cyber Security | Main Roads Western Australia

2025-2026

State government cyber security placement focused on identity, monitoring, governance, reporting and automation.

- Developed KQL queries in Microsoft Sentinel to analyse sign-in activity, MFA issues, error codes and success/failure trends for investigation triage.
- Supported Defender XDR and SIEM monitoring workflows by reviewing alerts and correlating identity and endpoint activity where required.
- Performed identity and access reviews covering privileged accounts, guest accounts and group memberships to support least privilege and access hygiene.
- Contributed to Essential Eight uplift activities, phishing awareness work, macro security controls, validation workflows and governance documentation.
- Built Power BI reporting for operational/security metrics and automated audit evidence collection using PowerShell and Microsoft Graph API.
- Produced procedures, knowledge documentation, risk assessment templates and audit evidence for repeatable cyber security and governance processes.

Junior IT Systems Engineer | ITDynamics

2023-2025

Managed services role including full-time onsite support at Prendiville Catholic College after an initial remote service desk period.

- Provided Level 2 ICT support in an education environment of approximately 1,300 staff and students, supporting BYOD, staff Windows/Mac devices, iPads, AV/Vivi systems, Wi-Fi, printers and general ICT issues.
- Handled around 5-10 staff tickets per day plus regular walk-in support, balancing urgent classroom issues with device, account, software, network and application requests.
- Supported Microsoft 365, SharePoint, Teams, Active Directory, Group Policy, Jamf Pro, Jamf School, Intune exposure, Windows, macOS, iOS/iPadOS and business applications.
- Administered user access, permissions, group memberships, device deployments, enrolment and account-related support across Microsoft 365 and school systems.
- Deployed and maintained Apple devices through Jamf Pro/Jamf School, supporting app deployment, device lifecycle, compliance and endpoint troubleshooting.
- Supported Aruba Central, Aruba/HPE and Cisco environments, including switch/AP checks, patching, port changes, VLAN checks, factory reset/provisioning and wireless troubleshooting.
- Troubleshoot connectivity issues by checking cabling, link lights, switch ports, VLAN assignment, DHCP/DNS behaviour, wireless coverage, authentication and endpoint configuration.
- Maintained technical notes, support procedures and knowledge base articles in ConnectWise and IT Glue to improve repeatability, escalation quality and handover.
- Built Python and Power Automate solutions for PDF/OCR processing, onboarding/offboarding and recurring support tasks, reducing manual effort and improving consistency.

Onsite school ICT support in a secondary school environment.

- Delivered onsite Level 1 ICT support for approximately 1,000 staff and students across a 1:1 student device program, staff Windows/Mac devices, iPads, AV/Vivi systems, printers, Wi-Fi and classroom technology.
- Supported more than 50 classrooms and learning spaces, helping maintain continuity for lessons, assessments, meetings and school events.
- Triaged and resolved staff/student requests covering account access, login issues, device faults, software issues, printing, Wi-Fi and classroom AV; escalated complex issues to Level 2/3 teams.
- Assisted with device imaging, deployment, setup, repairs, user onboarding, account support, shared/loan devices, charging trolleys and routine classroom technology checks.
- Produced user guides and how-to documentation to help staff resolve common ICT issues, reduce repeat requests and improve confidence with school systems.
- Built strong communication habits by explaining technical issues to non-technical staff and students clearly, calmly and respectfully.

EDUCATION

- University of Western Australia - Bachelor of Science: Computer Science, 2025
- Edith Cowan University - Bachelor of Science: Registered Nursing, 2020

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications/Clearances:** CompTIA Network+; Cisco: Introduction to Data Science; Working With Children Check; Current Australian Police Clearance; CEWA mandatory reporting/child protection training; Manual handling & CPR training.
- **ICT Support & ITSM:** onsite, remote and walk-in support; incident/request triage; escalation; SLA-aware support; hardware/software troubleshooting; device deployment, imaging, rebuilds and repairs; account management; onboarding/offboarding; telephony support; printers, AV/Vivi and classroom technology; user follow-up; customer service; knowledge base, user guide and handover documentation; ConnectWise, IT Glue, ServiceNow exposure and Freshdesk exposure.
- **Microsoft & Endpoint:** Microsoft 365, Teams, SharePoint, OneDrive, Outlook/Exchange Online exposure; Active Directory; Group Policy; Entra ID/Azure AD exposure; Windows/macOS/iOS/iPadOS; imaging, rebuilds, app installs, software deployment, updates and device troubleshooting; Jamf Pro/School; Intune/SCCM exposure; MFA/sign-in troubleshooting; permissions, access reviews and least privilege.
- **Networking & Infrastructure:** DNS, DHCP, ARP, subnetting, routing concepts, switching, VLANs, Wi-Fi and VPN; Aruba Central, Aruba/HPE switches/APs; Cisco switches; port checks, patching, trunk/access port concepts, factory reset/provisioning, cabling/link-light troubleshooting and Zabbix exposure; layered troubleshooting across physical, network and endpoint issues, infrastructure deployment and replacement.
- **Automation, Data & Reporting:** Power Automate, Microsoft Forms, SharePoint workflows, PowerShell, Microsoft Graph API, Bash, Python, PyMuPDF, OCR tools, SQL, Snowflake, Power BI, Excel and CSV/data processing; database/ORM concepts including Drizzle ORM and relational schema exposure.
- **Cybersecurity & Governance:** Microsoft Sentinel, Defender XDR, KQL, SIEM workflows, Essential Eight exposure, phishing awareness, identity/access reviews, audit evidence, risk documentation, patch compliance/remediation tracking exposure and secure configuration practices.
- **Development:** Python, Java, C, JavaScript, HTML/CSS, Flask, FastAPI, React, TanStack, REST API concepts, authentication/RBAC concepts, Git/GitHub, Azure DevOps-style workflows, CI/CD exposure and Jira exposure.
- **Interests:** Strength training, automation and app development, science fiction/fantasy, home technology and networking.
